

Overall Subscription Status (Total: 190)

Business Insight: Overall platform churn stands at **60.0%** (114 of 190 subscriptions churned). This exceeds standard SaaS annual benchmarks (20–30%), confirming that revenue sustainability depends on fixing retention rather than expanding acquisition volume.

Business Insight: Email Campaigns bring the highest-quality subscribers with the lowest churn rate (43.5%). Direct traffic exhibits the highest churn rate (66.7%), demonstrating a 23.2-point performance gap. Acquisition spend should be reallocated toward email-driven lifecycle nurturing.

Business Insight: Mid-tier **Standard** subscribers stay active the longest (141.8 days on average). Higher-tier **Premium** (98.5 days) and **Pro** (99.6 days) users churn over 40 days earlier, highlighting early value realization gaps in premium onboarding flows.

PAYMENT CHANNEL DISTRIBUTION — PAGE 4/6

Total Collected Revenue by Payment Method

Business Insight: Revenue collection across all payment methods is extremely balanced, led by **Apple Pay (\$20,297.56)** and **Debit Card (\$19,847.20)**. Frictionless mobile payment options account for a significant portion of platform revenue.

CUSTOMER LTV CONCENTRATION — PAGE 5/6

Top 10 Highest Lifetime Value (LTV) Users

Top 10 High-LTV Customers Concentration

Business Insight: Top customers generate disproportionate platform revenue, led by **User 84 (\$4,267.67)** and **User 73 (\$3,987.00)**. Dedicated VIP retention monitoring and proactive account management are required to protect these high-value accounts.

HISTORICAL REVENUE GROWTH — PAGE 6/6

Monthly Revenue Progression (2023 Cohort Start)

Early Monthly Revenue Growth Trajectory (2023)

Business Insight: Platform revenue expanded rapidly from **\$38.56** in January 2023 to **\$1,305.98** by October 2023. While gross revenue growth is robust, maintaining this trajectory requires curbing the overall 60% churn rate.
